

Lab 2: Generation of DEM with Drone Data

Student Name : Sushant Bhikaji Gurav

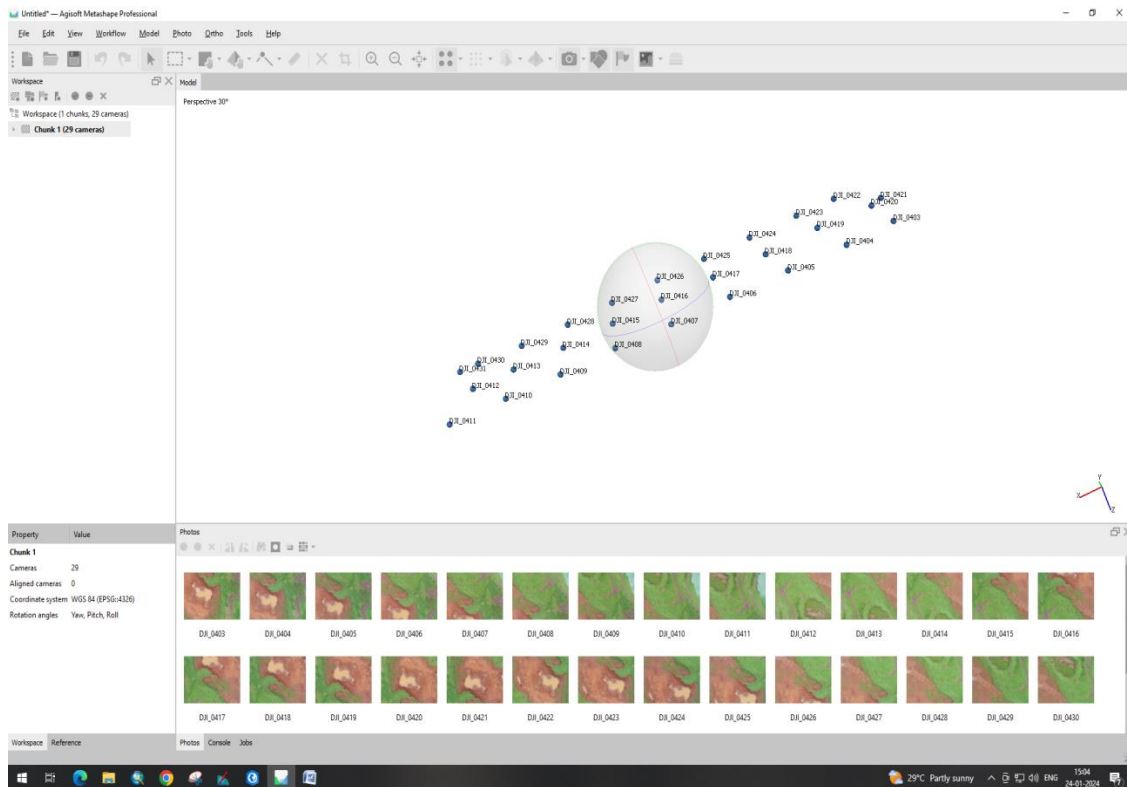

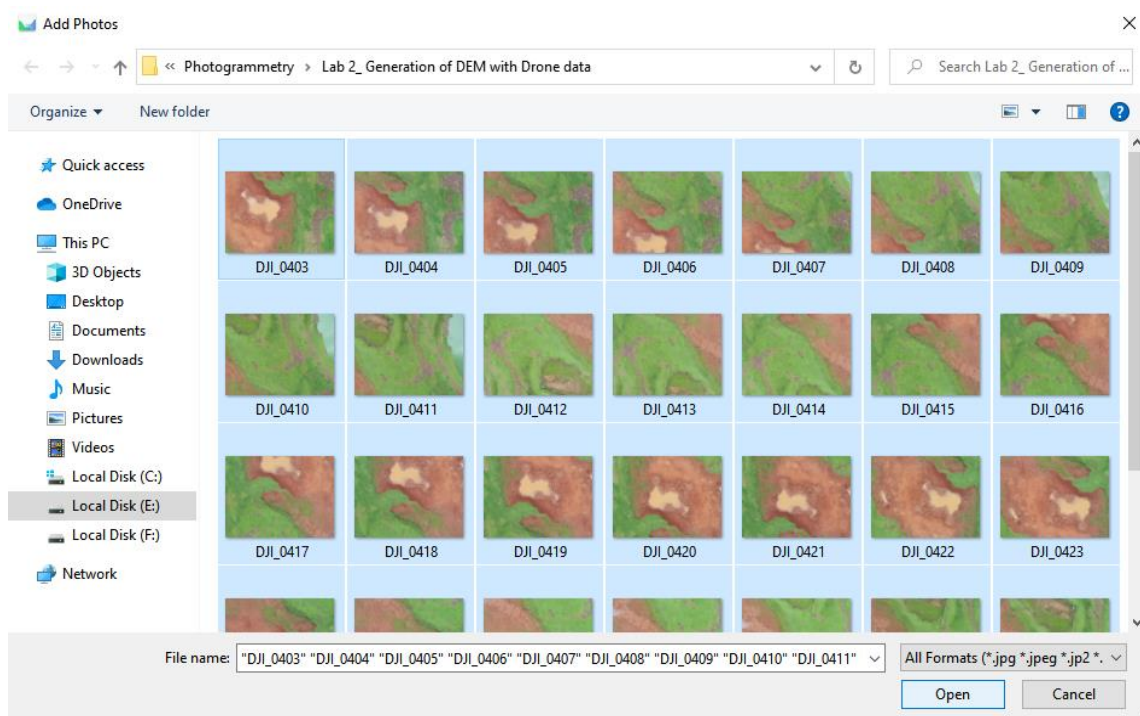

- 1) 1st install the Agisoft Metashape and open that

- 2) Then right click on workspace and add drone photo

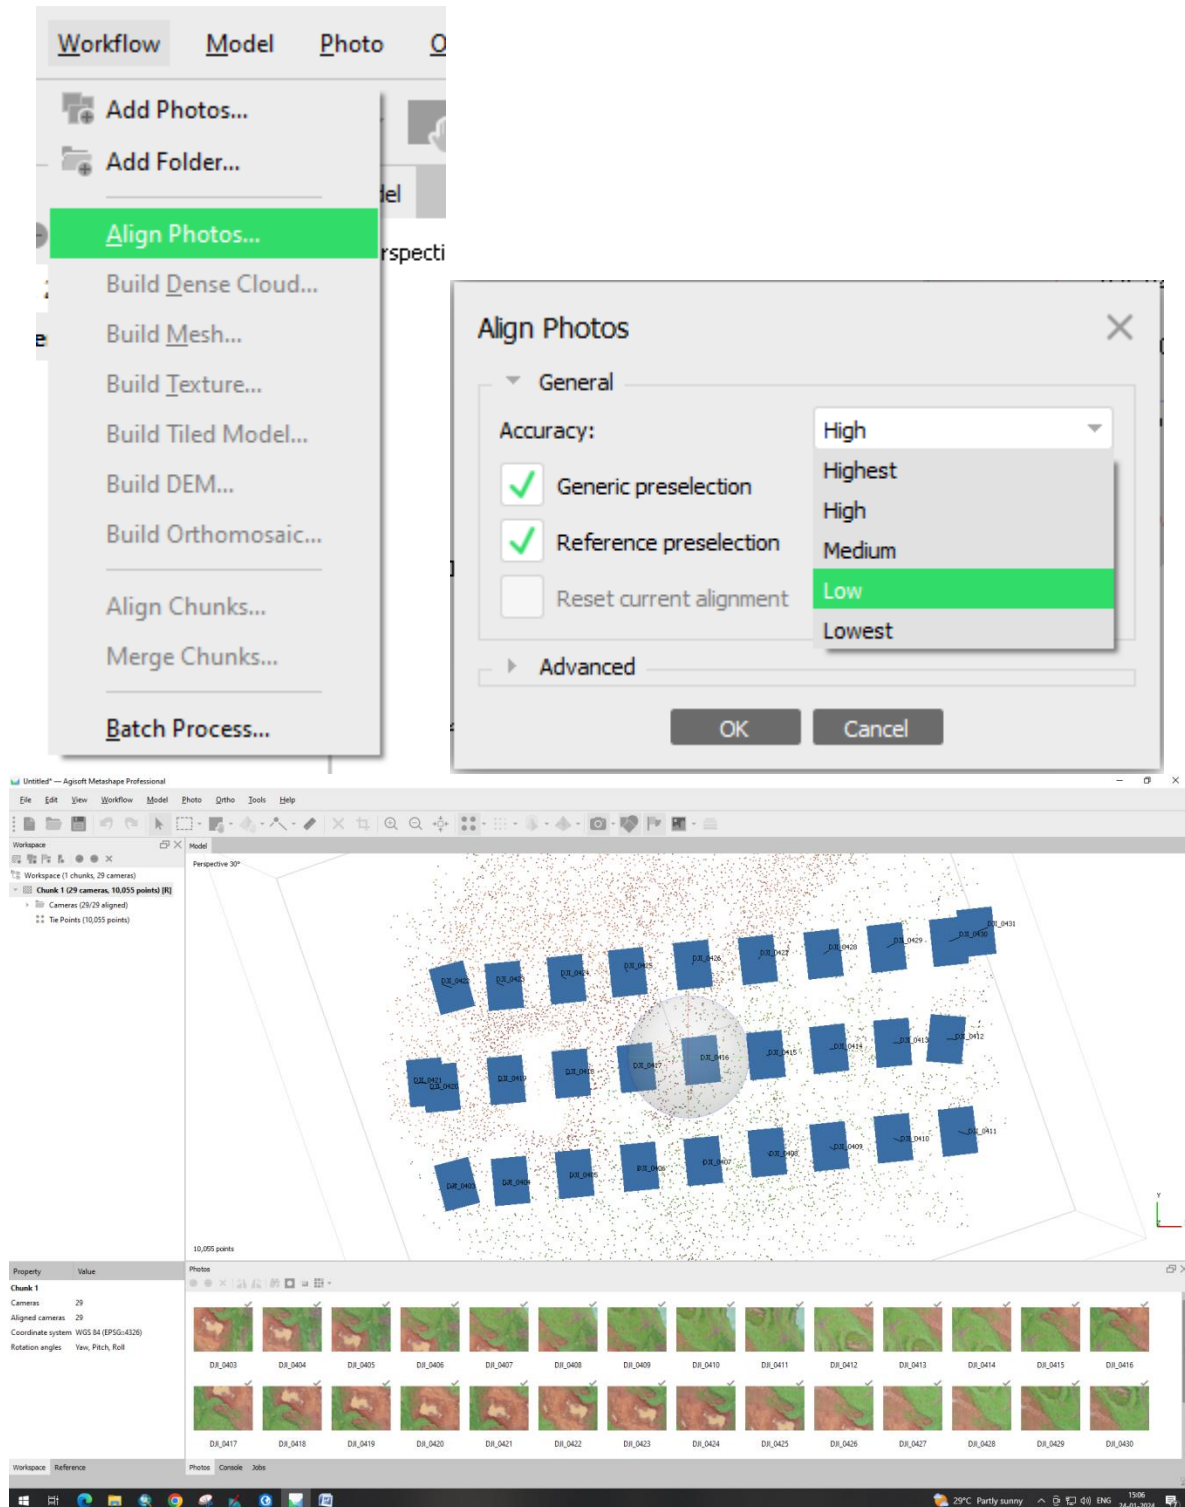

3) Select all photos

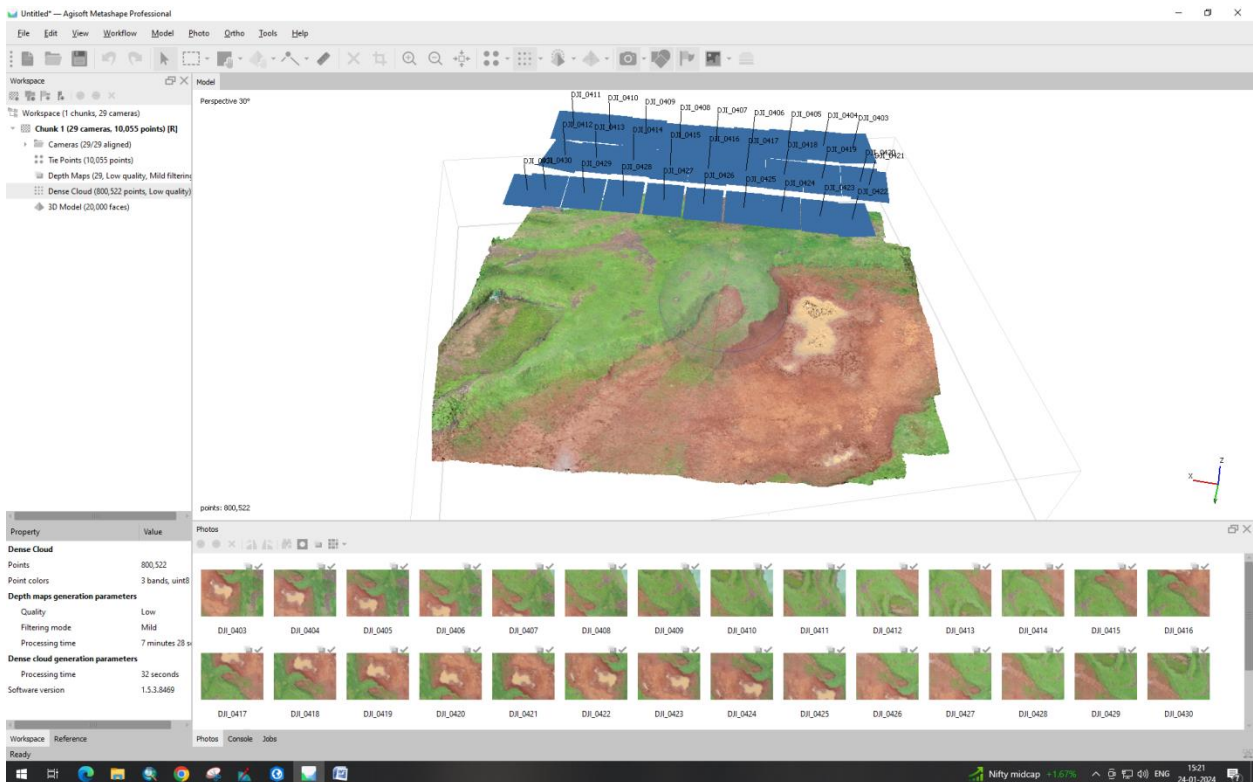

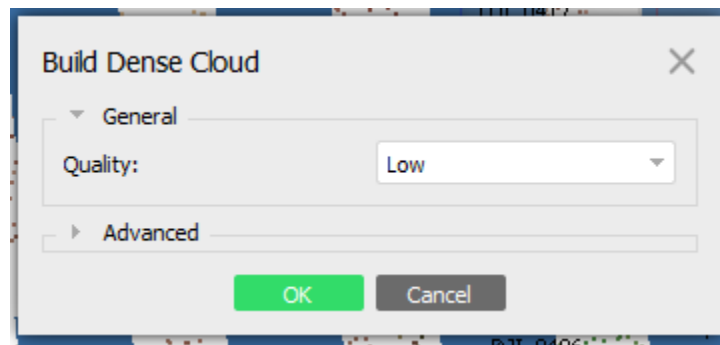

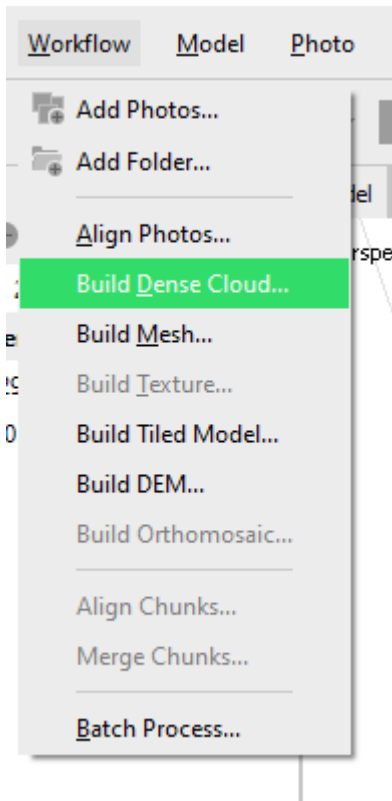

- 4) Go to work flow & click on **Align Photos** and choose quality of output

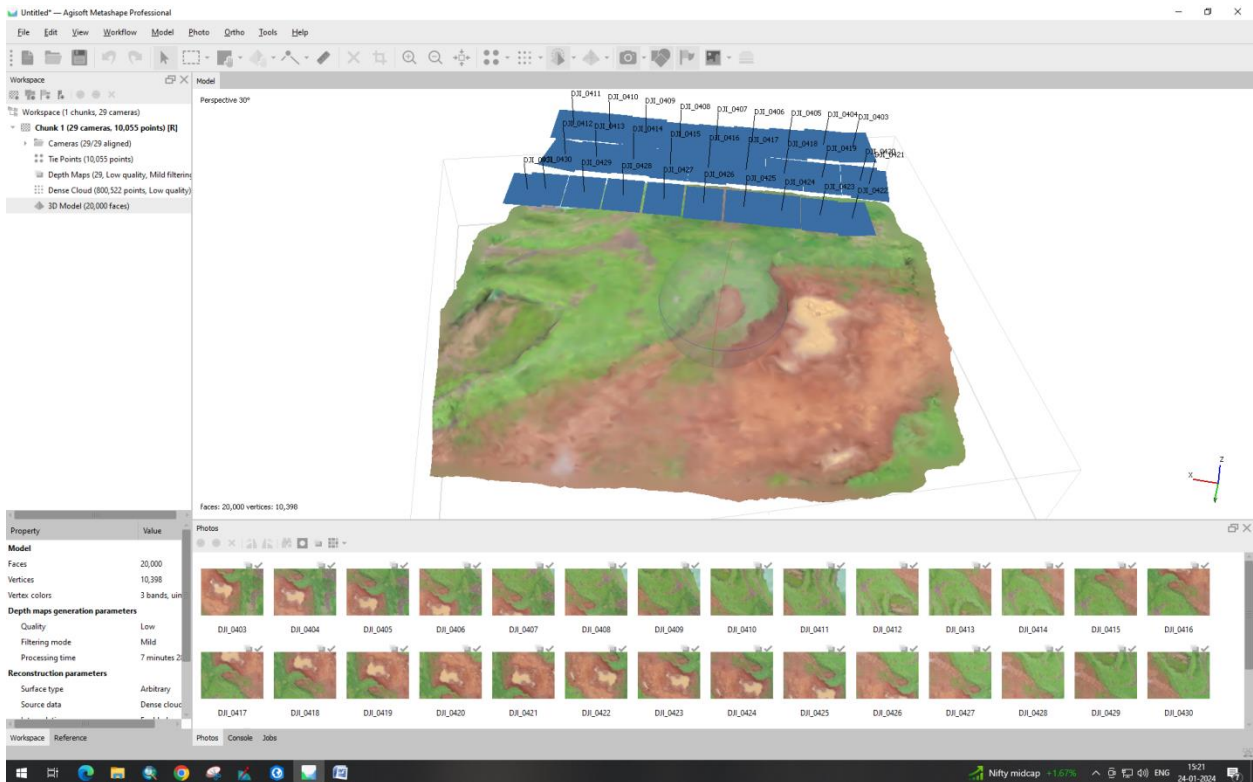

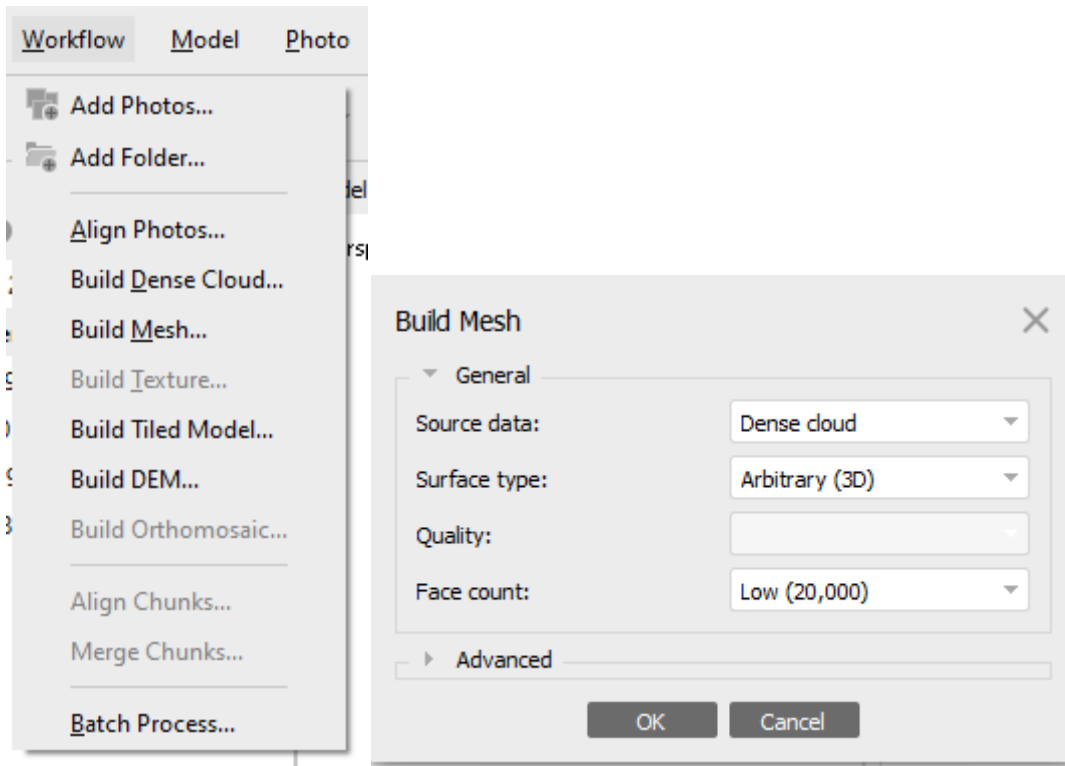

Image alignment is the process of overlaying images of the same scene under different conditions, such as from different viewpoints, with different illumination, using different sensors, or at different times.

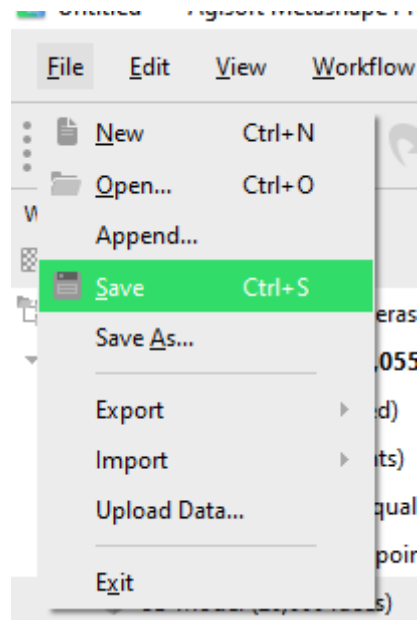

5) Go to **workflow** and select **Build Dense cloud** and choose quality

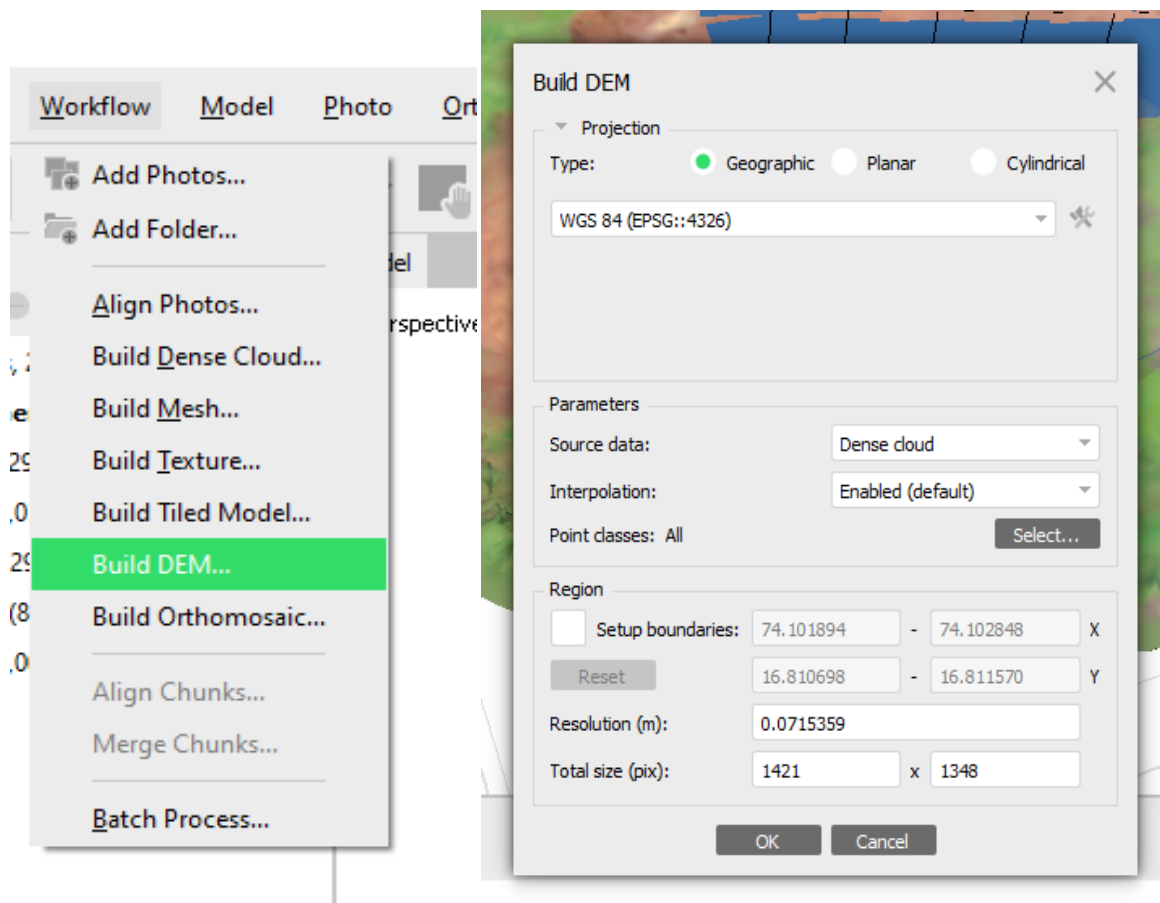

6) Go to **workflow** and select **Build Mesh**

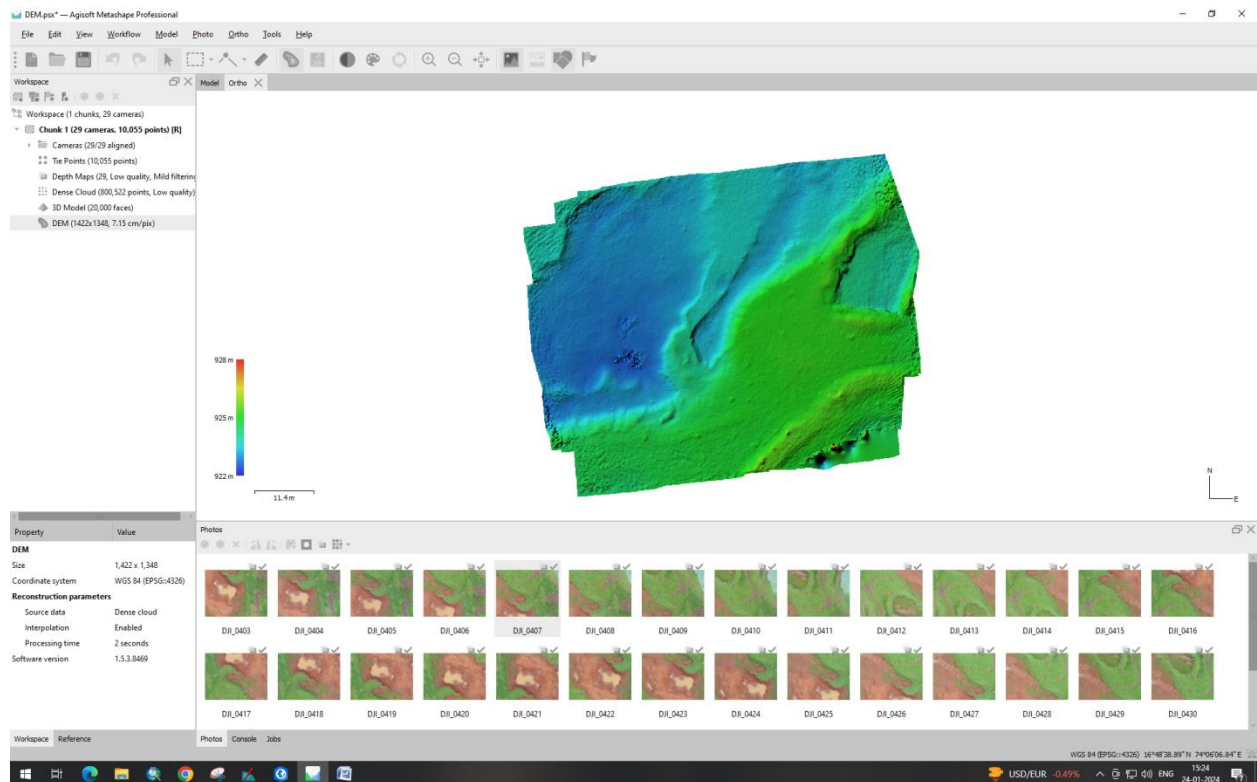

7) Then save file

8) Again Go to workflow and **click on Build DEM**

9) Last export the **DEM** in tiff format
