SUMMARY

GIS Analyst with hands-on experience in municipal GIS, property tax mapping, geospatial database management, and GIS workflow automation. Experienced in managing large-scale spatial datasets, conducting GIS QA/QC, topology validation, and developing Web GIS applications using ArcGIS Online and Experience Builder. Proficient in ArcGIS Pro, ArcMap, QGIS, Python, ArcPy, Google Earth Engine, QField, and Remote Sensing. Skilled in spatial analysis, map automation, geospatial data validation, and machine learning-based landslide susceptibility mapping. Passionate about delivering accurate, scalable, and automated geospatial solutions for municipal infrastructure, environmental monitoring, and smart city projects.

Experience

GIS Analyst

Thane Municipal Corporation Project

04/2025 Thane

- Managed and maintained large-scale municipal GIS datasets supporting property tax assessment, urban planning, and infrastructure mapping.
- Executed building footprint digitization, parcel boundary validation, and spatial attribute updates using ArcGIS Pro and QGIS to improve data quality and mapping accuracy.
- Performed GIS QA/QC, topology validation, spatial data verification, and error correction, ensuring consistency across municipal geospatial databases.
- Automated repetitive GIS workflows using Python and ArcPy, reducing manual processing time and improving operational efficiency.
- Developed and deployed QField mobile GIS projects for field verification, data collection, and synchronized spatial updates.
- Supported Web GIS applications using ArcGIS Online and Experience Builder to improve visualization and access to municipal spatial information.
- Collaborated with project teams to maintain standardized GIS workflows, geodatabases, and documentation.

GIS Intern

Sahyadri Tiger Reserve

05/2024 - 06/2024 Karad

- Collected, processed, and managed geospatial datasets supporting wildlife habitat monitoring and biodiversity conservation.
- Performed LULC mapping, NDVI analysis, and spatial assessment using remote sensing techniques.
- Prepared thematic maps and cartographic outputs for conservation planning and project reporting.
- Assisted in geodatabase management, spatial data organization, and GIS analysis for environmental monitoring.
- Supported field data collection and GIS-based ecological assessments.

SKILLS

ArcGIS Online	Arcpy	ArcGIS Pro
ArcGIS 10.8	Python	QGIS
Google Earth Engine		Remote Sensing
Web Maps & Applications		GIS QA/QC
Geodatabase Management		Pix4D
Experience Builder		ERDAS Imagine
Map Automation		Agisoft Metashape

PROJECTS

Landslide Susceptibility Mapping Using Machine Learning

- Tools: ArcGIS Pro, QGIS, Python, Google Earth Engine
- Developed a GIS-based landslide susceptibility model using Random Forest, SVM, and XGBoost.
- Performed terrain and remote sensing analysis using DEM, LULC, NDVI, rainfall, and geological data.
- Generated susceptibility maps to support disaster risk assessment and decision-making.

Municipal Property Tax Web GIS Application

- Tools: ArcGIS Online, Experience Builder, ArcGIS Pro
- Developed an interactive Web GIS application for municipal property visualization and management.
- Published web maps and configured search, pop-ups, and layer management.
- Improved access to spatial property information through an intuitive web interface.

Urban Waterlogging Hazard Assessment

- Tools: ArcGIS Pro, QGIS
- Performed raster and vector-based spatial analysis to identify waterlogging-prone areas.
- Integrated elevation and land use datasets to produce flood hazard maps.
- Supported urban planning through GIS-based risk assessment.

Education

M.SC Geoinformatics

Shivaji University

06/2023 - 04/2025 Kolhapur

M.A. Geography

Shivaji University

06/2021 - 04/2023 Kolhapur
